

Dear parents,

We are so excited to open our doors on June 7th, 2020! We have missed the essential people that make gKidz so special - your kids and our volunteers! We cannot wait to worship, learn, and grow in our faith with you again! Please see the information below on how we would like to partner with you to keep our church family safe.

STEPS WE ARE TAKING TO PREVENT THE SPREAD OF VIRUSES:

We care about your kids and want to keep them safe. Given the heightened awareness of viruses during this season, we ask that you please partner with us to prevent the spread of illnesses. All volunteers, parents, and children should stay home for 14 days if they have been exposed to a person with the coronavirus, the flu, or any other communicable disease or have recently traveled to a CDC Level 2 or 3 country.

You may have questions about what we're doing to ensure our environment is clean and safe for your family. We want to inform you of the steps we take every week to prevent the spread of viruses in our environments.

- gKidz volunteers and children's temperature will be checked prior to check in using a no touch digital thermometer. Any persons with a temperature of 100.4 or higher will not be allowed to check into gKidz.
- Volunteers follow hand-washing procedures and children are instructed to wash their hands after using the bathroom and before eating.
- Volunteers follow posted safe and sanitary diaper-changing procedures.
- Volunteers and children use hand sanitizer in all classrooms.
- Volunteers disinfect the classrooms and all surfaces after each service.
- Staff remove children from the classroom when they appear to be sick, and parents are paged to pick them up.

We ask that you not bring your child to church if they exhibit any of the following symptoms:

- Fever (during this season, must be fever-free for seven days)
- Vomiting or diarrhea (must be symptom-free for 24 hours)
- Common cold from onset through one week
- Respiratory infection
- Flu
- Sore throat or strep throat
- Croup
- Cloudy or green runny nose
- Persistent cough
- Body aches
- Headache
- Chills
- Fatigue
- Infectious or unexplained rash
- Pinkeye or other eye infection (must be on medication a minimum of 24 hours)
- Any childhood disease (e.g., scarlet fever, German measles, mumps, chickenpox)

We realize that not everyone will feel comfortable returning just yet. We understand and want to encourage you to continue to learn with us through our online resources at <https://mysecondchancechurch.com/gkidz/resources/>. As always, it is an honor to serve alongside our volunteers and partner with you. If you should have any questions, please feel welcomed to email me.

Thank you for helping us maintain safe environments for children to learn and grow in love and faith!
